

Alcohol Poisoning

If you think someone is experiencing alcohol poisoning signs/symptoms call 911

Signs of Alcohol Poisoning

- Staggering or losing balance
- Slurred or incoherent speech
- Sudden or unexpected sleepiness
- Vomiting
- Shallow Breathing and/or heart rate
- Passing out

If you suspect your child has consumed alcohol immediately call Poison Control at 1-800-222-1222

They will need to know:

1. The name of the product
2. How much is missing
3. How long ago it happened
4. The child's weight and age
5. Any symptoms the child is having
6. Your telephone number

In order to help keep persons under 21 from consuming alcohol:

- Lock up alcoholic beverages and hide the key.

- Empty out alcohol cans, containers, and glasses before children have a chance to get to them.
- Store mouthwash and alcohol-containing cleansers out of sight and reach.
- Talk to your children/teens about alcohol.
