This innovative five-day training event engages behavioral health and other healthcare providers and college students in the respective areas of study by exploring cultural competencies and behavioral health issues unique to Service Members, Veterans and their Families.

The focus of this program is to allow professionals who work with or have an interest in the military population a chance to experience a modified "Mobilization Training" and learn how to address some of the challenges faced by our military today.

You will have the unique opportunity to experience some of the following: team building exercises, virtual combat simulators, and combat missions training (including paintball). Participants were surprised with a

Blackhawk helicopter training flight at a previous event!

Listen to personal experiences and learn from our amazing speakers such as Behavioral Health Professionals, Doctors, Counselors, Clinicians, Educators, Nurses, and National Guard Members.
